

Appendix A:

Driver Stop DIs for Individual City and County Agencies

Tables A1-A5 show, for each of the 150 agencies serving cities and counties, the driver stop DI calculated for each driver racial/ethnic group (that is, how many drivers in each group were stopped relative to the group's driving-age representation in the resident population of the locality served by the agency). The number of stops made by each agency for drivers in each group is also shown. The numbers of stops reported by each agency will vary due to traffic volumes in each area, and because different agencies reported data for different periods of time for the nine-month period July 1, 2021 – March 31, 2022 (that is, some agencies with high traffic volumes may have reported fewer stops than agencies with lower traffic volumes because the high-volume agency may have reported only six months of data). The number of days of data reported for each agency ("Number of Traffic Days") is also shown in the tables (273 days = July 1, 2021 – March 31, 2022).

Tables are shown for Black, Hispanic, American Indian, White and Asian drivers.

DIs for the joint agency York-Poquoson Sheriff's Office were calculated based on the driving-age resident population figures for the joint localities served by each Sheriff's Office.

Several cautions should be kept in mind when examining the DIs for each agency in the tables that follow:

- Driver stop DIs calculated for agencies with a very small resident population and very small numbers of stops are suspect due to the small numbers involved and should not be considered meaningful. This applies to DIs for all racial/ethnic groups. See the previous section *Statewide Disparity Index (DI)* for more explanation.
- As discussed in the section *Statewide Disparity Index (DI)*, driver stop DIs were calculated using each racial/ethnic group's percentage of the resident driving-age population of the area served by the agency. The resident population percentages do not necessarily represent the percentages of drivers in the area. For example, the Carroll County Sheriff's Office had a high Black driver stop DI of 21.4. An examination of the stops for this agency showed that the vast majority of the stops were made on an interstate highway that runs through Carroll County; therefore, the number of Black drivers subject to being stopped by this agency was much higher than the relatively small percentage of Black residents in the county's resident population. Black drivers were less than 1% of the county's population.
